What I aspire to learn:

Scrum, CI/CD, Svelte, Angular, Sass, Typescript, React native, C#

Personal Profile

I'm a full stack software engineer who learns quickly and adapts to new day-to-day technologies, I really like the Front End, this has allowed me to have experience as a good client-side developer, but also with great knowledge of the Back End to face greater challenges.

Languages most used:

Front End:

Back End:

Educational Training

Holberton School

fullstack software engineer.

- I've had, the school methodology is peer learning approach, they gave us new projects every day increasing their complexity
- Focused on the aptitude to solve big problems in smaller parts.
- learn to learn, with this methodology i can adapt to any situation

Self-taught

3D Design

- Modeling and Retopology, Render and lighting, Sculpt and baking, PBR materials.

JS Frameworks

- I like very much Front End side of web development, so i improve my skills in JS, learning Vue.js, React.js and Node.js

SENA

Mechatronic design

- Attended from Apr. 2011 to June 2014
- 1st place in robotics championship
- Approve the automation of the mechatronic system according to international standards.

Career Summary

Full Stack Developer

Leverage Services

- Build several Views and Models using Django to connect the Database with Back End and send data to Front End side.
- Design the views with HTML, CSS, BOOSTRAP and JS to receive the data from Back End.

Full Stack Developer

SIM-TAC

- Design and code all app Front End using HTML/CSS/JS
- Build some views and models with Django and MySQL.
- Deployed in DigitalOcean tools.
- Link the API of Charts to our app to use it using JavaScript

Full Stack Developer

Holberton School

- Design the Frontend aplication for AirBnB project, with HTML5, CSS and JavaScript (Jquery)
- Unit Testing with Python
- Design all stack for a big project called HBnB, clone of AirBnB app
- Shell: Creation of a personal version of the Linux Shell. Made on C (syscalls, standard I/O, child processes, signals and interrupts).

Logistics Director

Family Marketig

- Solve the synchronization of shipments nationwide
- lead a team, with which we deliver merchandise locally.
- Engage in conversations with customers and suppliers for the constant flow of the company
